

Figure 1 is a plot showing the number of particles per event as a function of the number of particles per event. The x-axis ranges from 0 to 40, and the y-axis ranges from 0 to 8. Data points with error bars are shown for Ghost (black), Electron (red), Muon (green), Pion (blue), Kaon (yellow), and Proton (purple). The plot shows a distribution of particles per event, with a peak around 1-2 particles per event and a long tail extending to 40 particles per event.
